Snapchat

Snapchat – If you abuse we will find you...

The privacy policy of Snapchat clearly states that they collect IP addresses from all accounts.

<https://www.snap.com/en-US/privacy/privacy-policy/>

Log Information. We also collect log information when you use our website. That information includes, among other things: details about how you've used our services.

- ▶ Device information, such as your web browser type and language.
- ▶ Access times.
- ▶ Pages viewed.
- ▶ **IP address.**
- ▶ Identifiers associated with cookies or other technologies that may uniquely identify your device or browser.
- ▶ Pages you visited before or after navigating to our website.

IP address is your digital fingerprint

Facebook and Twitter

Facebook and Twitter *Law Enforcement Can Subpoena "IP Addresses"*

On Social Media Apps, when users agree to the terms of service an account is formed and information is logged. One piece of this information is a user's **IP address.**

If a user is posting a "Threat" or dangerous material a law enforcement official can subpoena that information and the **IP address**.

The **IP address** is associated with a service provider, such as Verizon or ATT. Using the IP address the law enforcement officer can subpoena the service provider to supply name and address of the person who pays for that specific **IP address** for a cell service or internet service.

At that time, the law enforcement has all the information it takes to go to a specific home and both charge and apprehend the person responsible for the "threatening post."
